To Whom It May Concern:

Subject: New Service Connection Work on Private & Public Property

This is to inform you that Aquatera will no longer undertake any new service connection work on private property.

New service connections will now be separated into the Aquatera and private portions, by the property line.

Aquatera is responsible for and will maintain control of and perform all service connection work on its portion of services on public property, in all cases.

Aquatera will install its portion of new services with its own forces or by others at its sole discretion. This includes services in easements, utility R/W's and public property.

Aquatera will now require pre-payment of the estimated cost of the service connection and will no longer invoice customers for this work.

In transition, Aquatera will honour any previous commitments made to Developers or their agents prior to this notice. We will also carry through with any service connection work that was in progress prior to this notice, using the former process.

If you require additional information, please contact the writer at 780.538.0328.
