EXCITING EMPLOYMENT OPPORTUNITIES!

FIELD	WHAT DO THEY DO?	EDUCATION REQUIRED	OPPORTUNITIES
Administrative Finance/Accounting Human Resources	There are a variety of roles throughout our organization relying on these professionals to provide high-quality, environmentally sustainable utility services and optimize value to customers and shareholders.	Education will vary depending on the role. Some positions may require a one-year office administration certificate and other positions may require a degree or designation in accounting or other discipline.	Career growth may depend on education and experience as the employee grows in their career.
Distribution and Collection Operations	Our Distribution and Collection team provides a variety of support and services across our service area. This includes maintaining the Aquatera infrastructure, underground pipes, replacing and servicing water meters, repairing water and sewer mains, and installing new services as a part of our commitment to quality.	This position can be performed with little experience as on-the-job training is provided including potential of acquiring operator certifications. A Class 1 or 3 driver's license is an asset.	As operator levels increase, so does the rate of pay. There may be paid practicum placements available each year with hours that count towards operator levels.
Engineering	Our Engineering team works with developers, consultants, contractors, and other stakeholders to: - Provide oversight of corporate interests within municipal planning and development - Monitor, model, and assess utility systems - Update capital plans and policies, and so much more!	Engineers require a four-year university degree. We may offer paid co-op placements to engineering students to provide them with real-time experience. Engineering Technologists are typically graduates of a two-year diploma program.	Career growth may depend on education and experience as the employee grows in their career.
Solid Waste Operations	Customer service based position with little experience needed as on-the-job training is provided.	Training courses offered to achieve and further education as an operator. Driver's license is required. Class 3 or higher is an asset.	As operator levels increase and additional competencies are achieved, this allows the operator to perform tasks with greater responsibility resulting in additional pay benefits.
Water and Wastewater Treatment Operations	Our first priority is to ensure the residents of the communities we serve are provided with clean, safe drinking water. To keep this promise, we have some of the most qualified operators in Alberta on our team, working around the clock. This position also ensures that wastewater has been effectively treated in order to return it to its source of origin.	One-year NAIT Water/Wastewater Technician course recommended. Training may be offered to further education in order to obtain and further certification levels.	As experience, training, and certification levels are accomplished, there are opportunities to achieve a level IV in both Water Treatment and Wastewater Treatment. As operators levels increase, so does the rate of pay. There may be paid practicum placements available each with hours that count towards operator levels.
